

KO-Tab™

Tejasco's advanced Tablet solution for restaurants

Would you agree, to be successful you need to do the following....

- Reduce and track wastage's
- Make more business with repeat customers
- Achieve customer delight
- Increase table turnover ratio
- Increase productivity with less manpower

Our path breaking KO-Tab solution will help you achieve all of these and many more.

Our KO-Tab™ helps Steward / Waiter to choose a table and take order by selecting respective items from item list. Once steward finishes the order taking, the same is passed to kitchen with all the details through wireless print-outs.

This application can also be used by consumers, if restaurant owner can provide the smart phone mobile device for every customer in the restaurant.

KITCHEN ORDER TOKEN PROCESS

KO-Tab™ is a must to have mobile application for restaurants. This simplifies the order taking process in restaurants. Hotels and Restaurants strive to create an environment that adapts to each guest's preferences, allowing them to enjoy the attention. This will help improved service and reduced labor costs in the restaurant. Most of the restaurants have increased their profit and maximized control over their business in just few weeks.

Key Features:

- Your POS or PMS billing software synchronization with our Ko-Tab Software. I.E., Menu, KOT & KOT modifier details.
- Digital KOT transactions.
- Handwriting based KOT selection.
- Digital Menu.
- Easy tracking on Running and cancelled KOTs.
- Tracking customers food preference & ratings.
- Customer feedback forms integrated for quick access and tamper proof data.
- Thank you notification to the guest & SMS alert to restaurant manager for poor rated feedback.
- Capturing guest's previous KOT for better customer service.
- Anniversary & Birthday notification for cross & up sale.
- Customer feedback report.
- Supports counter based printing for multiple kitchen format.
- Single click upload of Menu for standalone system.
