

Medinfo-Tab™

Enterprise In-Patient Care Management System (ICMS)

Mobility is Ability

Next Gen Mobile Application for SMART Hospitals

Is your hospital still on paper based case sheets?... time to change to Tab based digital case sheets”

In the growing need for digitalization and usage of mobility solutions, Healthcare stands first. There has been great IT revolution in all areas of Healthcare industry and Tejasco's recent contribution adds to the list.

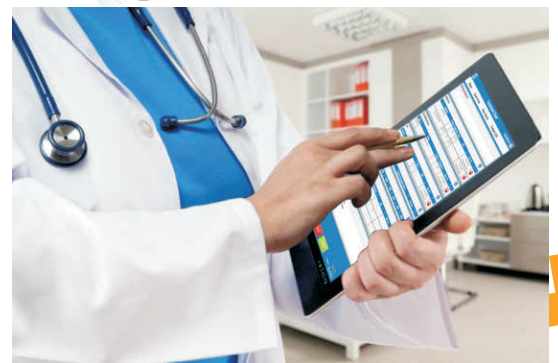

Tejasco has simply replaced pen and paper with digital ink and Tablet to introduce Medinfo-Tab an Android based solution, the first of its kind in the Healthcare industry.

A quick glance shows every aspect of the healthcare vertical is automated these days and one area, which has been neglected, is the Case sheet management in hospitals for inpatients. When seconds count, and focus on the needs of inpatient is critical, need for a solution that makes patient care reporting simple, accurate, and effective is critical.

Tejasco's Medinfo-Tab solution tracks and monitors the patients health and medication from admission to discharge for both surgical and non-surgical cases.

Tejasco's technical team along with the best of Doctors from various specializations has built Medinfo-Tab , which eases the life of Consultants, Resident Doctors and Nurses.

A smart application that runs on Android tablets helps Consultants, Resident Doctors and Nurses to monitor the health of patients, medications and investigations on tablets, which reduces more than 80% paper work. The solution also lets Consultants to monitor their patient's health progress outside the hospital premises, which gives a greater mileage for a proactive health management system.

Medinfo-Tab™

Enterprise In-Patient Care Management System (ICMS)

Mobility is Ability

Next Gen Mobile Application for SMART Hospitals

Best in class work process digitalization application for smart hospitals

Key Features

- Vitals Management
- Treatment Chart
- Nurse Sheet
- Resident Doctor Sheet
- Diet Management
- Anesthesia
- Pre-surgery
- Post Surgery
- Discharge Summary
- RFID for Patient tracking movement
- SMART wearables integration

Medinfo-Tab USP

- Reduces upto 80% of paper work
- Nurses productivity enhanced by 70%
- One click information app
- Proactive healthcare services
- Easy sharing of data between group hospitals
- Increased data accuracy

How it works
