

Mobile solution for a large Ice Cream distribution dealer

Business Need	The client is a large ice cream distributor who supplies to over 100 outlets each day. The dealer had a manual process and had no real time monitoring of his stocks and distribution
Challenges	There were lot of challenges with the distribution to the networked outlets in terms of quantity, time and costing. The dealer wouldn't have details of cash versus credit sales and also if there was a short supply to the outlets untill the monthly invoices were raised
Solution Offered	Given the business need and challenges, Tejasco positioned an Android based mobile stock and distribution management solution called "Sales on the Move" to the customer. Details of each delivery to an outlet had to be entered in the mobile solution by the sales rep which were synced to the cloud and the customer could see the live data giving no room for slippages and revenue leakages.
Technology Stack	Android Studio, Java, SQL-Lite, MYSQL, Amazon Cloud services
